SpeechRecognition Crack Free Download, is a handy and reliable application designed to recognize and execute vocal commands. The program is able to perform a set of predefined tasks via speech recognition. Thus, you can launch various utilities such as Notepad, Calculator, Task Manager and even websites such as Facebook, Yahoo and Google. SpeechRecognition can also be used to control computer functions such as the mouse or trackball, as well as any desktop application. The program is flexible and the user has full control over all kinds of speech. What I would expect of your application: * A compact and professional user interface. * The ability to control a number of functions. * The ability to launch external programs with the command associated with them. * Ability to save the program state in case there is a connection loss. * Disable the program when the computer is idle. * Ability to send what the user says to the application program which would be able to understand it and process its content. You may possibly need to write a simple speech recognizer engine, which the software could use to identify a speech pattern. What I expect from you: * Efficiency - be sure that your code works well, without any problems, preferably with respect to speed and hardware requirements. * A good interface and user-friendly appearance. * A simple, transparent code. How we'll collaborate: We will go through the code and make necessary improvements. You will have access to the.exe, testing with it is of no charge. Also, I can help you with installing the application and we'll go through the installation procedure together. You will be able to download the original code in the source code folder so that you can compare the two versions and after that make the required changes. How we'll operate the project: - Payment for the project will be done after the application is successful. - The programmer will have to work on the problem I mentioned above. - If the user interface needs more attention, additional work will be done. - Any additional help/assistance in any other functionality will be included in the overall price. What is the advantage for you of working with me: I have an extensive experience in Unity and C# programming and I will be able to help you with the problems you might have.
