## Mouse Button Mapper License Keygen

Key Macro Record/Play is the application that allow you to record a macro and play a macro with mouse buttons, keyboard, etc. Key Macro does not need any mouse drivers. Screenshot: ]]> Thank you for all the feedback that we received. This version of the application was very well received. We are very pleased to see you like the program and that you are using it. This next update will be out next week and it will contain some new features and improvements. We know that many of you were waiting for this version and we are sorry about the delay, but I wanted to wait until I got some feedback about the 2nd version before putting it out. The new version will include a few new features, a slightly more user friendly UI and some improvements to make the program more useful to the general public. Here is a quick summary of the new features and improvements in this update: Some improvements were made to the Auto-Switch feature that now will be able to switch the mappings for both the modifier keys and the mouse buttons. This is very helpful for those of you that are using both a keyboard and a mouse at the same time. Some small improvements have been made to the macro recorder and playback functions to make them more convenient to use. A major problem with the previous version of the program was that it was not able to run in DOSBox. This version has been rewritten to run under DOSBox so that is no longer a problem. The command line switches will now also work under DOSBox. The command line switches are now located in the Tools Menu on the main window of the program. Some small improvements have been made to the program so that the program will start up a little faster. A bug has been fixed that was preventing the install program from reading the default settings.exe file on the default install location. A lot of new icons have been added to the program. We are sure you will find them very useful. Some minor cosmetic changes have been made to the UI to make it more uniform. The instructions on how to install the program have been corrected so that they will be more clear. Some minor cosmetic changes were made to the save window in case you were not happy with the previous appearance. We have added a few more key mappings for those of you that have not been using the program. This should prove to be useful for those of you that

## What's New in the Mouse Button Mapper?

The Mouse Button Mapper is a tool that will remap the mouse buttons to keys. Remapping is accomplished by placing the mouse cursor over the desired button and typing a keyboard character. The new mouse button then becomes the current mouse button. You can remap the mouse buttons to keys by using the mouse button left and right buttons to select the desired button to be remapped. Currently the mouse buttons and keys that can be remapped include the following: HID2 | HID1 LeftMouse Button | RightMouse Button Windows Button | WindowsKey RightMouse Button | LeftMouse Button LeftArrow | RightArrow Forward/ Back/ Home | Left/Right UpArrow | DownArrow Page Up | Page Down PgUp | PgDown LeftShoulder | RightShoulder Select | Escape Reverse | Delete ESC | CapsLock Delete | Restore LeftMouse Button | Home LeftMouse Button | End LeftMouse Button | Right CapsLock | LeftMouse Button LeftMouse Button | Delete RightMouse Button | Space LeftMouse Button | Control LeftMouse Button | Tab LeftMouse Button | LeftMouse Button | Enter CapsLock | RightMouse Button LeftMouse Button | Escape These settings are applied to the following operating systems: Microsoft Windows 9x/Me Microsoft Windows NT Microsoft Windows 2000 Microsoft Windows XP Microsoft Windows 2003 Microsoft Windows Vista Microsoft Windows 7 Microsoft Windows 8 This software is written and tested in Visual Studio 6.0.
