All the folders and Internet URLs can be easily organized in a comprehensive and intuitive window that enables you to access them with just a click. The main purpose of this application is to significantly increase your productivity by avoiding the repeat of the same action, which takes time and can be quite frustrating. With ShortCutsManager, you can overcome this inconvenient and increase work efficiency. The main interface of the application is simple, consisting of a single window that can help you store and manage all the shortcuts. Adding a new item to the list is just a matter of a few clicks. You have to assign a relevant name to the entry, in order to identify it easier and enter the URL, in case of a website or the location on the hard disk, if it is a folder we are talking about. All the added shortcuts are neatly displayed within the main window, in an organized manner. The contents of the generated table can be filtered and set to display the folders, the web URLs or both. Additionally, if your list is getting quite long, the search function can assist you in finding the shortcut you need. ShortCutsManager can be set to run at system startup, in order to have all your frequently used folders and links at your fingertips. On the downside, the application cannot store links to files or important system locations, such as the Control Panel.
