Get the new features and innovations in FIFA 22 below. HyperMotion Technology Improvements to the Tackling and Defensive Mentality System As the center of your attacks and defensive strategies, your team's defenders work hard for each other. Create-A-Defender has also been rebuilt. Players now receive more instruction when conducting defensive actions. If a defender is being taken out by an attacker, his teammates will instinctively protect him or even start chasing the attacker. Your players can anticipate the goalkeeper's actions. Passes and shots by the goalkeeper will appear more erratic. Passing options will be limited if your goalkeeper is in a good position for the shot. When your goalkeeper fakes a shot, the player receiving the pass will shift and expect it, changing the way they can attack. When a goalkeeper dives, he'll automatically change tactics. The closer he dives, the more run time he has, and the more advantageous it is to attack from distance. Dodgy out-of-balance goalkeepers will struggle to cope with shooting power. Defending against crosses and set-pieces is an order of magnitude more difficult. Set-pieces Opposing set-piece artists are a constant threat, but fans can now take control of the defending team. Fans are now even more crucial to the success of set-pieces. Set-piece reactions can be reactivated at any time. Fans can change their reactions even while the action is still progressing. Fans can score more goals Save your favorite players and stadiums from instant demolition. Tiles react to crowd behavior, changing the way stadium and pitch look, and affecting players. You have the option to see how your players affect the environment in real-time. "Crowds" mode will also introduce the first ever "Tiebreaker" score. New crowds mode entitled "Fans' Favorites" has been added to "League Cup"

mode. The Fans' Favorites mode features a new goalkeepers that you unlock by completing your favorite players' "coaching career" tasks.
