The molecular biology of a proton-coupled D-glucose transporter (SGLT1) and H(+)-secretory proteins (H(+)-V-HCO(3)(-) cotransporter (PHT)) has been thoroughly characterized. In this study, we have determined the effect of various morphine-derived drugs on SGLT1 and PHT mRNA and protein expression in rat ileum. The aim of this study was to investigate the effect of morphine-derived drugs on the occurrence of ileal hypermotility via the inhibition of ileal PHT protein. Rats were randomly assigned to control group, morphine group, and morphine + naloxone group. After intraperitoneal injection of morphine sulfate, naloxone, and distilled water, rats' ileal muscle tissue samples were examined by immunohistochemistry. The expressions of SGLT1, PHT protein, and their mRNA in the ileum were detected by real-time PCR and Western blot
